Task: Responsive Design for Login & Sign Up Pages

The task is to design Login and Sign Up pages with a strong focus on responsiveness — meaning they should look good and work well across all screen sizes.

:white_check_mark: What you need to do:

- Design both pages in any style you like.
- Make sure the layout is fully responsive.

:mag: Do some research and read about the following concepts/tools:

- Expanded
- Flexible
- MediaQuery
- Packages like flutter_screenutil (or any other package you find useful)

You can use any of them — choose what you're comfortable with.

:dart: The goal of this task is to evaluate:

- How well you handle responsiveness
- Your code quality

:alarm_clock: Deadline: Saturday at 3:00 PM

Let me know if you have any questions. Good luck!
